Design Software	Figma
Programming Languages	JavaScript
Hands-on Experience	React-Js, React-Native, Rest API, HTML5, CSS, Tailwind CSS, Material UI, Bootstrap

EXPERIENCE

SOFTWARE DEVELOPER at Pixel Values Technolab July 2023 – Present

- As a front-end developer, I spearheaded innovative projects, leveraging my diverse expertise and passion for pushing technological boundaries. My role involves:
- Collaborating with cross-functional teams to integrate innovative features and improve application performance.
- Led Android app and web development projects, ensuring seamless functionality and implementing responsive and visually appealing user interfaces.
- Thriving in dynamic environments by adapting to evolving project requirements and tight deadlines.
- **Tech stack using:** JavaScript, React-JS, React-Native, REST APIs, Tailwind CSS, Material UI, Android Studio.

FRONT-END DEVELOPER INTERN at Advertyzement Oct 2022 – March 2023

- Worked on live projects that had responsive websites that were completely operational.
- Completed the project's tasks.
- **Tech stack used:** HTML, CSS, JavaScript, React-JS, REST APIs, Tailwind CSS.

FRONT-END DEVELOPER TRANIEE April 2022 – Oct 2022

- I learned how to use the new tech stack to create different websites.
- Developed live projects that were fully functional and responsive.
- Tech stack learned: HTML, CSS, JavaScript, ReactJS, REST APIs, ChartJS, Bootstrap, Tailwind CSS, Material UI.

PROJECTS

Yallafit Github Repo

- This is a customer-side food delivery app, Customers can choose our diet plan according to their needs.
- This app asks the user what kinds of food they want and their motive for maintaining their body.
- And then suggest their meals according to their questions.
- **Tech Stack Used:** React-Native, Rest API, PI Chart

Pixel Cart Github Repo

- This is an e-commerce app like Amazon and Flipkart.
- user can explore products category-wise and buy them.
- **Tech Stack Used:** React-Native, Rest API

KEC Pump

[Github Repo](#)

- This app asks you what kind of motor pump you want.
- And suggests what kind of motor pump is best for the customer and some suggestions.
- **Tech Stack Used:** React-Native, Rest API

Crypto Tracker Project

[GitHub Repo](#) | [Live Demo](#)

- This Crypto Tracker tracks currency status by percent, market cap, etc.
- It shows the current status of coins, it is helpful for us to see which coins grew up and which ones are down.
- **Tech stack used :** ReactJs, CSS, Material UI, Rest API
