## PROFESSION SUMMARY

Innovative Software Developer specializing in building responsive web and mobile applications with React.js and React Native. Experienced in delivering high-quality projects with a focus on performance and user experience. Passionate about creating user-centric solutions that drive business growth and innovation

## EDUCATION

**RTMNU University, Nagpur**, BACHELOR OF SCIENCE in Computer Science
**Janata College, Chandrapur**, HIGHER SECONDARY in General

## TECHNOLOGY SKILLS

| | |
|---|---|
| **Programming Languages** | JavaScript |
| **Web Technologies** | HTML5, CSS |
| **API's** | REST API |
| **Tools** | Figma, Android Studio |
| **Frameworks/Libraries** | React.js, React Native, Redux, Tailwind CSS, Material UI, Bootstrap, Chart.Js |

## EXPERIENCE

**SOFTWARE DEVELOPER** at Pixel Values Technolab                                     July 2023 – Present

- Designed and developed visually appealing and responsive user interfaces for web and Android applications using React.js and React Native.
- Worked closely with cross-functional teams to enhance app performance and integrate seamless features.
- Project Led development efforts on Android and web projects, delivering high-quality solutions that met or exceeded client expectations.
- Adapted quickly to evolving project requirements and ensured timely delivery within tight deadlines.
- **Tech stack using:** JavaScript, React.js, React Native, Tailwind CSS, Material UI, REST APIs

**Front-End Developer Trainee**

- Gained hands-on experience in developing functional, responsive websites using modern technologies.
- Worked on live projects, learning the complete development lifecycle and best practices for front-end development.
- **Tech stack learned:** HTML, CSS, JavaScript, React.js, REST APIs, Chart.js, Bootstrap, Tailwind CSS, Material UI.

## PROJECTS

**Pre-Works**                                                                          Github Repo

- Developed a React Native application with three user roles: Customer, Contractor, and Architect..
- Enabled customers to register, upload site images, and list construction work requirements.
- Implemented a bidding system where contractors can view project listings and place bids.
- Designed a feature for customers to review and accept contractor bids.
- Allowed architects to create profiles and showcase their past projects.
- Integrated role-based access and optimized user experience for seamless project interactions.
- **Tech Stack Used**: React Native, REST APIs.

**Yallafit**                                                                           Github Repo

- A customer-side food delivery app enabling users to select diet plans based on their preferences.
- Integrated a questionnaire-based system to suggest meal plans tailored to user goals.
- **Tech Stack Used**: React Native, REST APIs, Chart.js

**KEC Pump**                                                                    Github Repo

- A recommendation app that assists users in choosing the ideal motor pump based on their needs.
- Designed a question-and-answer flow to provide accurate product recommendations.
- **Tech Stack Used**: React Native, REST APIs

**Pixel Cart**                                                                  Github Repo

- An e-commerce app similar to Amazon and Flipkart, offering product exploration and purchasing features.
- Implemented a category-based browsing system for enhanced user experience.
- **Tech Stack Used**: React Native, REST APIs
