PROFESSIONAL SUMMARY

Software Developer with hands-on experience building high-quality, scalable web and mobile applications using React Native, React.js, and Redux. Passionate about creating intuitive, user-centric solutions that align with business needs. Skilled in working across full development lifecycles with rapid delivery.

EDUCATION

B.Sc. Computer Science from **Rashtrasant Tukadoji Maharaj Nagpur University, Maharashtra**
Higher Secondary (Science) from **Janata College, Chandrapur**

TECHNOLOGY SKILLS

Languages	JavaScript, Typescript
Frontend	React Native, React.js, Redux, Tailwind CSS, Material UI, Bootstrap, Chart.js
Web	HTML5, CSS3
APIs	REST APIs
Tools	Git, Figma, Android Studio

EXPERIENCE

SOFTWARE DEVELOPER at Pixel Values Technolabs   July 2023 – April 2025

- Designed and developed visually appealing and responsive user interfaces for web and Android applications using React.js and React Native.
- Collaborated with cross-functional teams including designers, backend developers, and QA to deliver seamless and performant applications.
- Led development efforts on both Android and web platforms, consistently delivering high-quality, scalable solutions aligned with client expectations.
- Adapted quickly to evolving project requirements, consistently delivering on time without sacrificing code quality.
- Successfully launched a mobile application on the Google Play Store, managing the end-to-end deployment process and post-launch support.
- **Tech stack used: JavaScript, React Native, ReactJs, Typescript, Redux, Tailwind CSS, Git, APIs**

PROJECTS

Pre-Works   **Live || Github Repo**

- It is a user-friendly platform that brings together customers, contractors, and architects in one place.
- This app simplifies the entire process for home, office, or commercial construction projects.
- Customers can post their construction requirements with detailed information, images and PDFs.
- Contractors can explore projects, submit bids, and connect with potential clients.
- Architects can showcase their previous works and connect with new clients.
- Features include integrated role-based access and an optimized user experience for smooth project interactions.
- Developed and deployed the app live on the Play Store.
- **Tech Stack Used: React Native, REST APIs**

Yallafit   **Github Repo**

- A customer-side food delivery app enabling users to select diet plans based on their preferences.
- Integrated a questionnaire-based system to suggest meal plans tailored to user goals.
- **Tech Stack Used: React Native, REST APIs, Chart.js**
